- Any one elective subject may be offered as an open elective (for specific departments).
- For all electives except Elective—II and Elective VI, the course can be selected from the approved list of elective/open elective courses. Students who are doing internships outside the institute will be permitted to opt for these courses in the online mode, if available. Otherwise, they may select the equivalent subjects from the subject available on the online platform with the permission from the department.
- For Elective–II and Elective-VI, course contents / online courses will be suggested by the supervisor and evaluation will be done by the supervisor. It is desirable that the concerned supervisor select the courses available on the online platform as approved by the department.
- Practical Training carried out after the sixth semester will be evaluated in the seventh semester. This also covers internships carried out at industries/ R&D organizations/ reputed academic institutions. Any practical training/internship done before the sixth semester shall not be counted against the above.
