

## Manual for new users

After creation of user id in HPC system

How to access the HPC system from windows laptop

Download the **mobaXterm** Software. Which is Opensource for windows Install MobaXterm Software

Open Mobaxterm Software from your windows machine. Type below command

```
ssh -X Username@14.139.206.67 press enter
```

Then enter password of your user.

Now you are logged in.

(On login, if find *-bash: /opt/g09/bsd/g09.profile: Permission denied*, ignore it, it is related to g09 software (chemistry department). Users who want to use this software can ask for permission through mailing on [hpc@nitsikkim.ac.in](mailto:hpc@nitsikkim.ac.in))

For test Program type

- `cd /opt/onama/Onama_Execution_Model/`
- `java -jar onama_execution.jar`

It will OPEN ONAMA-GUI. Then use any application in which you are interested in just by click.

For Linux OS laptop no need to install any software, all above mentioned process can be done in Terminal.
